

MANIFESTO | BEAU RIVAGE

*Stajvelo*

ABOVE  
(Thierry Manni with RV01)

## hello

Welcome to the world of Stajvelo.

After RV01, urban ebike, I wanted to create a road racing bicycle. This leads me to the Beau Rivage. This bike pays tribute to the Beau Rivage climb in Monaco. After hundreds of geometries set ups and far more test rides, our R&D experts reached the best balance between comfort and performance. Made in Monaco with an Italian handcrafted carbon composite frameset, Beau Rivage is the state-of-art of road bike. It is the result of Stajvelo know-how that will delight passionate riders. The Beau Rivage comes in capsule limited edition, only for our exclusive community.

The frame decoration is given to our craftsmen's savoir-faire with high attention on details and quality. The perfect road bike with chic design and first choice components.

Each bicycle has its own history and its own riders. I hope you will find as much pleasure riding our bikes as we have had in making them.

See you soon on the roads!

Thierry Manni  
Founder & CEO

# MONACO

*Where it all began*

# OUR PHILOSOPHY

*The hardest thing is to make it simple.*

*Stajvelo* is more than a bicycle, it's a concept.

*Beau Rivage* has been designed to offer you comfort and performance. Therefore, giving you pleasure, fun, and pride as you ride!

With *Beau Rivage* you experience a beautiful bike made in carbon fiber by the best craftsmen.

*Beau Rivage* is a tailor-made bicycle, customizable to your dreams with a large range of colors and decorations.

Combining revolutionary design with the latest technologies, we built the most elegant and performant bike on the road today.

Our values: *passion, simplicity, perfection, comfort*

(Savoir-faire)

## FRAME SET

*Beau Rivage* has bold, clean aero lines, a bike that expresses the idea of riding just by looking at it.

It is made with high-modulus carbon fibers and nano-tech resins. Our exclusive and unique building technique comes up the WR Braided Monocoque System (WrBMs) which provides stiffness, performance and comfort. Moreover, the lightness is improved with a frame weight of only 978 gr\*. The fork is built with a multi thickness carbon fiber layering with a 45mm rake.

Two options are available for the frame set:

- 1K / T1100 carbon fiber layup. With this configuration the whole bike is 12% lighter and 17% stiffer. Perfect for riders looking high performance and race purposes.
- 3K / T800 carbon fiber layup. With this configuration the bike absorbs mainly all the micro-vibration coming from the road's surfaces. Perfect for riders looking for comfortable ride without giving up a performing bike.

## COCKPIT

The cockpit is available in two different handlebar options depending on your ride style and with a latest-generation saddle

- Fully integrated bar and stem with a system of completely built-in-cabling. It has an aero profile and a minimalist look. Fully made in UD carbon fiber and in dedicated sizes. This version meets the needs of evolved cyclists seeking state-of-the-art cockpit design.

- Classic combination of a 3K carbon fiber handlebar with an alloy stem which perfectly absorb micro-vibrations.

- Short nose saddle with ergonomic cut out and UD carbon fiber rail.

## WHEELS SET

The *Beau Rivage* wheels set is the perfect balance between performance, comfort and safeness. The carbon fiber rims has a streamlined shape with a 28mm width and a groove section of C/21 in which is possible to fit clincher or tubeless tires. Straight pull spokes are assembled on an alloy 70-75 hub with seal ball bearing. Two options on profile depth: 37mm and 67mm.

The double disc braking system is assembled on a centerlock configuration and tires set by Pirelli are the latest PZERO™ Velo with the best grip under all weather conditions.

STAJVELO

### TAILOR-MADE CONCEPT

For the launch of this new model, we have created a tailor-made section: a digital “atelier” where you can fully customize your bike. Hundreds of color combinations, components and accessories, drive you to your own exclusive dream *Beau Rivage*.

A service of custom-made bike is at disposal for the most demanding customers.

### GROUPSET

*Stajvelo* only offers the excellence regarding groupset. The *Beau Rivage* can be set up with:

**CAMPAGNOLO**  
Super Record EPS 12 speed disc

**SRAM**  
Red AXS 12 speed disc  
Force AXS 12 speed disc

**SHIMANO**  
Dura Ace Di2 11 speed disc  
Ultegra Di2 11 speed disc

## GEOMETRIES

Thanks to *Stajvelo* R&D team morphological studies and the savoir-faire of our masters frame-builder, we were able to figure out a specific ergonomic position to combine performance and comfort.

As safety is a special matter for us, *Beau Rivage* has a great frame reactivity but with no shimming effect. You will find your perfect bike between the standard size:
